ACTIVITY 2 – COMPREHENSION AND ANALYSIS

1. What is a recent example of environmental migration?

One recent example of environmental migration occurred due to the droughts in Somalia in 2016-17. The severe droughts caused crops to fail and livestock to die, which meant the depletion of food reserves. As a result, many Somalians crossed the border into surrounding countries in search of food.

2. What is a recent example of political migration?

One recent example of political migration has occurred due to the civil war in South Sudan. This conflict has led to civilians being attacked and having their property destroyed. Over two million people have fled to surrounding countries, most of them to Uganda and Ethiopia.

3. List four different reasons as to why someone might internally migrate.

- New job
- To be closer to family
- More favourable climate
- Education
